From Jack Orischak, CCGC's resident philosopher....

Do y'all remember, before the
internet, that people thought the
cause of stupidity was the lack of
access to information?
Yeah. It wasn't that.

Due to the Christmas holiday, the NCCC will be closed beginning at 6 p.m. ET on December 24, 2022, and will be back in operation at 8 a.m. ET on December 26, 2022.

For your convenience, all electronic background check submissions, including the NICS E-Check and XML traffic, will be available 24/7, to include Christmas Day.

Please understand, we try to handle all incoming transactions as efficiently as possible; however, it is not always possible to avoid hold times on the telephone. In addition, our current phone system processes incoming calls on a first in, first handled basis. There is no need for a Federal Firearm Licensee (FFL) to contact the NCCC from a second phone line while on hold for the initial call as this will not expedite service.

In the unlikely event of a NICS outage between 6 p.m. Christmas Eve through Christmas Day, the system will remain unavailable until 8 a.m. Monday, December 26, 2022.

Research Experiment Exposes Key Problem with Anti-gun Social Science

“Social science is in the midst of a replication crisis. This means the findings of many published social science papers cannot be reproduced and are likely invalid. A new paper published in the Proceedings of the National Academy of Sciences (PNAS) sheds light on the scale of the problem and calls into question the veracity of social science research in general, including that which anti-gun advocates use to push for gun control.”

Reality Check: Gun Sales, Carry Permit Numbers Remain Strong

“As President Joe Biden winds down 2022 by continuing to push for “much stricter gun laws” and describing “the idea we still allow semiautomatic weapons to be purchased” as “sick,” ordinary Americans appear to have a healthy disdain for his gun control agenda.”

January 21: National Hugging Day

January 24: National Compliment Day

January 24: Community Manager Appreciation Day (Every 4th Monday of January)

January 25: Opposite Day

January 28: Data Privacy Day

Fair Use Act Disclaimer

This site is for educational purposes only!!

****FAIR USE****

Copyright Disclaimer under section 107 of the Copyright Act 1976, allowance is made for "fair use" for purposes such as criticism, comment, news reporting, teaching, scholarship, education and research.

Fair use is a use permitted by copyright statute that might otherwise be infringing.

Non-profit, educational or personal use tips the balance in favor of fair use.

FAIR USE DEFINITION:

(Source: http://en.wikipedia.org/wiki/Fair_use)

Fair use is a doctrine in the United States copyright law that allows limited use of copyrighted material without requiring permission from the rights holders, such as for commentary, criticism, news reporting, research, teaching or scholarship. It provides for the legal, non-licensed citation or incorporation of copyrighted material in another author's work under a four-factor balancing test. The term "fair use" originated in the United States. A similar principle, fair dealing, exists in some other common law jurisdictions. Civil law jurisdictions have other limitations and exceptions to copyright.

U.S. COPYRIGHT OFFICE - FAIR USE DEFINITION:

(Source: <http://www.copyright.gov/fls/fl102.html>)

One of the rights accorded to the owner of copyright is the right to reproduce or to authorize others to reproduce the work in copies or phonorecords. This right is subject to certain limitations found in sections 107 through 118 of the copyright law (title 17, U.S. Code). One of the more important limitations is the doctrine of "fair use". The doctrine of fair use has developed through a substantial number of court decisions over the years and has been codified in section 107 of the copyright law.

Section 107 contains a list of the various purposes for which the reproduction of a particular work may be considered fair, such as criticism, comment, news reporting, teaching, scholarship, and research. Section 107 also sets out in four factors to be considered in determining whether or not a particular use is fair:

1. The purpose and character of the use, including whether such use is of commercial nature or is for nonprofit educational purposes
2. The nature of the copyrighted work
3. The amount and substantiality of the portion used in relation to the copyrighted work as a whole
4. The effect of the use upon the potential market for, or value of, the copyrighted work

The distinction between fair use and infringement may be unclear and not easily defined. There is no specific number of words, lines, or notes that may safely be taken without permission. Acknowledging the source of the copyrighted material does not substitute for obtaining permission.

The 1961 Report of the Register of Copyrights on the General Revision of the U.S. Copyright Law cites examples of activities that courts have regarded as fair use: "quotation of excerpts in a review or criticism for purposes of illustration or comment; quotation of short passages in a scholarly or technical work, for illustration or clarification of the author's observations; use in a parody of some of the content of the work parodied; summary of an address or article, with brief quotations, in a news report; reproduction by a library of a portion of a work to replace part of a damaged copy; reproduction by a teacher or student of a small part of a work to illustrate a lesson; reproduction of a work in legislative or judicial proceedings or reports; incidental and fortuitous reproduction, in a newsreel or broadcast, of a work located in the scene of an event being reported."

Copyright protects the particular way an author has expressed himself. It does not extend to any ideas, systems, or factual information conveyed in the work.

The safest course is always to get permission from the copyright owner before using copyrighted material. The Copyright Office
