# LAUGH OF THE WEEK

## The Pessimist

*Animal Jokes*

*Submitted by [iqannnylirod](#)*

He decided to try to break the news to a friend of his, a pessimist by nature, and invited him to hunt with him and his new dog.

As they waited by the shore, a flock of ducks flew by. They fired and a duck fell. The dog responded and jumped into the water. The dog, however, did not sink but instead walked across the water to retrieve the bird, never getting more than his paws wet.

The friend saw everything but did not say a single word.

On the drive home the hunter asked his friend, "Did you notice anything unusual about my new dog?"

"I sure did," responded his friend. "He can't swim."

## **Brace Yourself: Biden Administration Reinterprets "Firearm," Prepares Crackdown - NRA-ILA**

When we say "brace yourself," we're not kidding. The pistol brace rule is coming as well. But first, a different sort of crackdown was unleashed on the nation this week, as an ATF rule published on April 26 finally took effect on Wednesday. The regulation is entitled "Definition of 'Frame or Receiver' and Identification of Firearms." That rule is so cumbersome, complex, sprawling, and indecipherable that ATF was forced to publish an update to the "final" version on Monday, admitting: Due to the complexity of this rulemaking process and the resulting significant number of comments and revisions in response, the final rule inadvertently contained some technical errors in the regulatory text that this document corrects.

# FIREARM RECALLS

## SR22® PISTOL PRODUCT SAFETY BULLETIN

Ruger has discovered that a small number of SR22® pistols may have right and left frame inserts that are not properly secured together. In rare circumstances, this condition may render certain internal safety mechanisms ineffective and the pistol has the potential to discharge upon decocking. Pistols that may be exhibiting this condition will intermittently exhibit a "slack" single-action trigger.

NOTE: A "slack" single-action trigger occurs if, while operating the pistol in single-action mode **with a magazine inserted, the slide forward, and the manual safety disengaged**, a trigger pull does not encounter resistance and the hammer does not fall.

Although only a very small number of pistols appear to be affected, Ruger is committed to safety and would like to examine all SR22 pistols that have ever exhibited a slack single-action trigger or discharged upon decocking.

Potentially affected pistols include any SR22 pistol with a serial number of 369-40078 or lower (including all SR22 pistols with a "SS" prefix). If your SR22 pistol has ever exhibited one of the conditions described above, you should immediately stop using your pistol and **sign up** for the Safety Retrofit as outlined in the **Safety Bulletin**. If you have never experienced either condition, your pistol is not affected by this Safety Bulletin.

Details about what to look for and how to sign up for the retrofit also appear on our website at [Ruger.com/SR22Retrofit](http://Ruger.com/SR22Retrofit). The website also contains answers to Frequently Asked Questions, a video demonstrating the inspection process, and other information that you may find helpful.

## RECALL NOTICE

## R7 MAKO HANDGUN FIRING PIN SAFETY BLOCK RECALL

Kimber Mfg. Inc. ("Kimber") has discovered a quality issue involving the firing pin safety block of certain Kimber R7 model handguns shipped from January 10, 2022 through February 14, 2022. Firearms assembled with the subject firing pin safety block may release multiple rounds from a single trigger pull.

This Recall Notice applies only to the Serial Numbers of those products listed in the **List of Serial Numbers of Recalled Products** located at [kimberamerica.com/serial-r7-mako](http://kimberamerica.com/serial-r7-mako). If your handgun is among those in this **List of Serial Numbers of Recalled Products**, please contact us immediately by calling 888-243-4522, and do not load, use, sell, or otherwise make available your handgun, as the condition may lead to serious personal injury or death. Kimber is voluntarily recalling the affected products to help ensure the personal safety of the parties that purchased and/or used them.

VISIT [WWW.KIMBERAMERICA.COM/SAFETY](http://WWW.KIMBERAMERICA.COM/SAFETY) FOR  
COMPLETE DETAILS & AFFECTED SERIAL NUMBERS

## ATTENTION!

### Safety Warning and Recall Notice for Henry Single Shot Rifles and Shotguns

Henry Repeating Arms Company has recently discovered a potential safety issue wherein, under certain conditions, it is possible that some of these models may discharge without the trigger being pulled if the hammer is partially cocked and released.

All H015 model owners should visit [www.HenryUSA.com/recall](http://www.HenryUSA.com/recall) email [recall@henryusa.com](mailto:recall@henryusa.com), or call 866-200-2354 (M-F, 9AM ET-5PM ET) to obtain additional information.

## Fair Use Act Disclaimer

This site is for educational purposes only!!

**\*\*FAIR USE\*\***

Copyright Disclaimer under section 107 of the Copyright Act 1976, allowance is made for "fair use" for purposes such as criticism, comment, news reporting, teaching, scholarship, education and research.

Fair use is a use permitted by copyright statute that might otherwise be infringing.

Non-profit, educational or personal use tips the balance in favor of fair use.

**FAIR USE DEFINITION:**

(Source: [http://en.wikipedia.org/wiki/Fair\\_use](http://en.wikipedia.org/wiki/Fair_use))

Fair use is a doctrine in the United States copyright law that allows limited use of copyrighted material without requiring permission from the rights holders, such as for commentary, criticism, news reporting, research, teaching or scholarship. It provides for the legal, non-licensed citation or incorporation of copyrighted material in another author's work under a four-factor balancing test. The term "fair use" originated in the United States. A similar principle, fair dealing, exists in some other common law jurisdictions. Civil law jurisdictions have other limitations and exceptions to copyright.

**U.S. COPYRIGHT OFFICE - FAIR USE DEFINITION:**

(Source: <http://www.copyright.gov/fls/fl102.html>)

One of the rights accorded to the owner of copyright is the right to reproduce or to authorize others to reproduce the work in copies or phonorecords. This right is subject to certain limitations found in sections 107 through 118 of the copyright law (title 17, U.S. Code). One of the more important limitations is the doctrine of "fair use". The doctrine of fair use has developed through a substantial number of court decisions over the years and has been codified in section 107 of the copyright law.

Section 107 contains a list of the various purposes for which the reproduction of a particular work may be considered fair, such as criticism, comment, news reporting, teaching, scholarship, and research. Section 107 also sets out in four factors to be considered in determining whether or not a particular use is fair:

1. The purpose and character of the use, including whether such use is of commercial nature or is for nonprofit educational purposes
2. The nature of the copyrighted work
3. The amount and substantiality of the portion used in relation to the copyrighted work as a whole
4. The effect of the use upon the potential market for, or value of, the copyrighted work

The distinction between fair use and infringement may be unclear and not easily defined. There is no specific number of words, lines, or notes that may safely be taken without permission. Acknowledging the source of the copyrighted material does not substitute for obtaining permission.

The 1961 Report of the Register of Copyrights on the General Revision of the U.S. Copyright Law cites examples of activities that courts have regarded as fair use: "quotation of excerpts in a review or criticism for purposes of illustration or comment; quotation of short passages in a scholarly or technical work, for illustration or clarification of the author's observations; use in a parody of some of the content of the work parodied; summary of an address or article, with brief quotations, in a news report; reproduction by a library of a portion of a work to replace part of a damaged copy; reproduction by a teacher or student of a small part of a work to illustrate a lesson; reproduction of a work in legislative or judicial proceedings or reports; incidental and fortuitous reproduction, in a newsreel or broadcast, of a work located in the scene of an event being reported."

Copyright protects the particular way an author has expressed himself. It does not extend to any ideas, systems, or factual information conveyed in the work.

The safest course is always to get permission from the copyright owner before using copyrighted material. The Copyright Office
