[Misc Jokes](#)

Submitted by [wadejagz](#)

Wayne was returning home from a business trip, bags in hand, and slowly making his way to his vehicle in the crowded airport garage. Suddenly a large dark car screeched to a stop in front of Wayne, and the driver pointed menacingly at him. "Get in," the driver ordered. "I'll take you to your car."

Startled, Wayne took a step backward. "Ah...no thanks," he answered. "I can get there myself."

"No!" the man barked back as he threw open his passenger side door. "Get in!"

Wayne's eyes now darted around the garage, hoping to find a security guard.

Just then, the driver's face softened. "Please," he said, "I've been driving up and down for two hours. I can't find a space to park, and I want yours."

HOW MANY PEOPLE DIE EACH DAY?

Heart and blood vessel diseases are the leading cause of death worldwide

COVID-19 deaths are in the news daily, but how do they compare in a wider context?

Each day, there are almost 150,000 deaths globally. Below, we visualize these average daily deaths by cause, based on the most comprehensive source available, from 2017. At the end, we also show the scale of daily COVID-19 deaths to date.

- NON-COMMUNICABLE DISEASE*
- COMMUNICABLE DISEASE**, AND MATERNAL, NEONATAL, AND NUTRITIONAL DISEASES
- INJURY

* Includes influenza deaths.

Diarrheal diseases are the second leading cause of death among children under age 5.

Source: World Health Organization

Terrorism often dominates media coverage, but makes up a small proportion of total worldwide deaths.

Estimates calculated based on different timeframes.

COVID-19 DAILY DEATH AVERAGES

2,205 Dec 31- May 15 Avg

4,517 Mar 11-May 15 Avg. (Declared a pandemic on Mar 11)

7,504 Apr 13-19 Avg (Peak week of deaths)

Source: IHME, Global Burden of Disease via Our World in Data. Based on 2017 data. COVID-19 deaths are based on data from the European CDC - Situation Update Worldwide, as of May 15

[/visualcapitalist](#) [@visualcap](#) [visualcapitalist.com](#)

Due to the ongoing nature of the COVID-19 pandemic, it is impossible to predict the long-term death toll. This infographic is intended to provide context on the scale of COVID-19 deaths to date in relation to total worldwide deaths. *Most often caused by genetic, physiological, and environmental factors (i.e. unhealthy diet, smoking) **Most often, or always, caused by a communicable disease (i.e. contracted from a human, animal, or related contaminated items)

Fair Use Act Disclaimer

This site is for educational purposes only!!

****FAIR USE****

Copyright Disclaimer under section 107 of the Copyright Act 1976, allowance is made for “fair use” for purposes such as criticism, comment, news reporting, teaching, scholarship, education and research.

Fair use is a use permitted by copyright statute that might otherwise be infringing.

Non-profit, educational or personal use tips the balance in favor of fair use.

FAIR USE DEFINITION:

(Source: http://en.wikipedia.org/wiki/Fair_use)

Fair use is a doctrine in the United States copyright law that allows limited use of copyrighted material without requiring permission from the rights holders, such as for commentary, criticism, news reporting, research, teaching or scholarship. It provides for the legal, non-licensed citation or incorporation of copyrighted material in another author's work under a four-factor balancing test. The term “fair use” originated in the United States. A similar principle, fair dealing, exists in some other common law jurisdictions. Civil law jurisdictions have other limitations and exceptions to copyright.

U.S. COPYRIGHT OFFICE - FAIR USE DEFINITION:

(Source: <http://www.copyright.gov/fls/fl102.html>)

One of the rights accorded to the owner of copyright is the right to reproduce or to authorize others to reproduce the work in copies or phonorecords. This right is subject to certain limitations found in sections 107 through 118 of the copyright law (title 17, U.S. Code). One of the more important limitations is the doctrine of “fair use”. The doctrine of fair use has developed through a substantial number of court decisions over the years and has been codified in section 107 of the copyright law.

Section 107 contains a list of the various purposes for which the reproduction of a particular work may be considered fair, such as criticism, comment, news reporting, teaching, scholarship, and research. Section 107 also sets out in four factors to be considered in determining whether or not a particular use is fair:

1. The purpose and character of the use, including whether such use is of commercial nature or is for nonprofit educational purposes
2. The nature of the copyrighted work
3. The amount and substantiality of the portion used in relation to the copyrighted work as a whole
4. The effect of the use upon the potential market for, or value of, the copyrighted work

The distinction between fair use and infringement may be unclear and not easily defined. There is no specific number of words, lines, or notes that may safely be taken without permission. Acknowledging the source of the copyrighted material does not substitute for obtaining permission.

The 1961 Report of the Register of Copyrights on the General Revision of the U.S. Copyright Law cites examples of activities that courts have regarded as fair use: “quotation of excerpts in a review or criticism for purposes of illustration or comment; quotation of short passages in a scholarly or technical work, for illustration or clarification of the author's observations; use in a parody of some of the content of the work parodied; summary of an address or article, with brief quotations, in a news report; reproduction by a library of a portion of a work to replace part of a damaged copy; reproduction by a teacher or student of a small part of a work to illustrate a lesson; reproduction of a work in legislative or judicial proceedings or reports; incidental and fortuitous reproduction, in a newsreel or broadcast, of a work located in the scene of an event being reported.”

Copyright protects the particular way an author has expressed himself. It does not extend to any ideas, systems, or factual information conveyed in the work.

The safest course is always to get permission from the copyright owner before using copyrighted material. The Copyright Office
