#### Class war at its best.....

The folks who are getting the free stuff don't like the folks who are paying for the free stuff, because the folks who are paying for the free stuff can no longer afford to pay for both the free stuff and their own stuff.

And the folks who are paying for the free stuff want the free stuff to stop.

And the folks who are getting the free stuff want even more free stuff on top of the free stuff they are already getting!

Now... the people who are forcing the people who pay for the free stuff have told the people who are RECEIVING the free stuff that the people who are PAYING for the free stuff are being mean, prejudiced, and racist.

So... the people who are GETTING the free stuff have been convinced they need to hate the people who are paying for the free stuff by the people who are forcing some people to pay for their free stuff and giving them the free stuff in the first place.

We have let the free stuff giving go on for so long that there are now more people getting free stuff than paying for the free stuff?

Now understand this.

All great democracies have committed financial suicide somewhere between 200 and 250 years after being founded.

The reason?

The voters figured out they could vote themselves money from the treasury by electing people who promised to give them money from the treasury in exchange for electing them.

The United States officially became a Republic in 1789, 234 years ago.

The number of people now getting free stuff outnumber the people paying for the free stuff.

Failure to change that spells the end of the United States as we know it.

#### **Fair Use Act Disclaimer**

This site is for educational purposes only!!

\*\*FAIR USE\*\*

Copyright Disclaimer under section 107 of the Copyright Act 1976, allowance is made for "fair use" for purposes such as criticism, comment, news reporting, teaching, scholarship, education and research.

Fair use is a use permitted by copyright statute that might otherwise be infringing.

Non-profit, educational or personal use tips the balance in favor of fair use.

#### FAIR USE DEFINITION:

#### (Source: http://en.wikipedia.org/wiki/Fair\_use)

Fair use is a doctrine in the United States copyright law that allows limited use of copyrighted material without requiring permission from the rights holders, such as for commentary, criticism, news reporting, research, teaching or scholarship. It provides for the legal, non-licensed citation or incorporation of copyrighted material in another author's work under a four-factor balancing test. The term "fair use" originated in the United States. A similar principle, fair dealing, exists in some other common law jurisdictions. Civil law jurisdictions have other limitations and exceptions to copyright.

#### U.S. COPYRIGHT OFFICE - FAIR USE DEFINITION:

(Source: http://www.copyright.gov/fls/fl102.html)

One of the rights accorded to the owner of copyright is the right to reproduce or to authorize others to reproduce the work in copies or phonorecords. This right is subject to certain limitations found in sections 107 through 118 of the copyright law (title 17, U.S. Code). One of the more important limitations is the doctrine of "fair use". The doctrine of fair use has developed through a substantial number of court decisions over the years and has been codified in section 107 of the copyright law.

Section 107 contains a list of the various purposes for which the reproduction of a particular work may be considered fair, such as criticism, comment, news reporting, teaching, scholarship, and research. Section 107 also sets out in four factors to be considered in determining whether or not a particular use is fair:

- 1. The purpose and character of the use, including whether such use is of commercial nature or is for nonprofit educational purposes
- 2. The nature of the copyrighted work
- 3. The amount and substantiality of the portion used in relation to the copyrighted work as a whole
- 4. The effect of the use upon the potential market for, or value of, the copyrighted work

The distinction between fair use and infringement may be unclear and not easily defined. There is no specific number of words, lines, or notes that may safely be taken without permission. Acknowledging the source of the copyrighted material does not substitute for obtaining permission.

The 1961 Report of the Register of Copyrights on the General Revision of the U.S. Copyright Law cites examples of activities that courts have regarded as fair use: "quotation of excerpts in a review or criticism for purposes of illustration or comment; quotation of short passages in a scholarly or technical work, for illustration or clarification of the author's observations; use in a parody of some of the content of the work parodied; summary of an address or article, with brief quotations, in a news report; reproduction by a library of a portion of a work to replace part of a damaged copy; reproduction by a tecacher or student of a small part of a work to illustrate a lesson; reproduction of a work in legislative or judicial proceedings or reports; incidental and fortuitous reproduction, in a newsreel or broadcast, of a work located in the scene of an event being reported."

Copyright protects the particular way an author has expressed himself. It does not extend to any ideas, systems, or factual information conveyed in the work. The safest course is always to get permission from the copyright owner before using copyrighted material.
